Company Profile

Proficient Scaffolding Ltd (“Proficient”) was developed in response to the continued evolution of the scaffolding industry. We at Proficient felt the need to establish an organisation that supplies an extra dimension to the standard industry requirements. Having experienced firsthand the inflexible nature of some of the older scaffolding companies, Proficient has made a name for itself as a provider that listens to its clients and adapts accordingly.

All of our operatives are required to pass industry courses for a CITB card inline with our stringent training matrix. Every employee is security vetted inline with BS7858 to ensure employees are competent and of good character. We pride ourselves on the detail of design and application to erect scaffolds inline with TG20 the current industry standard.

We incorporate a vast wealth of knowledge drawn from years of experience within high profile cases from the industry. Our team has an impressive array of “hands on” experience in projects across the commercial and domestic spectrum; from critical national infrastructure, Marine and engineering sectors to the commercial construction site.

Our cornerstones are Professionalism, Integrity, Diligence and Flexibility.

Obligation Free Assessments

Proficient Scaffolding has a team of expert assessors qualified to conduct scaffolding appreciations. These assessments are followed by a formal report detailing any suggestions, drawings and costs. This is a free service and has no attached obligation.

Proficient Scaffolding Ltd is an active supporter of Help For Heroes

During the last year members of the Proficient Scaffolding team have completed the London Marathon, the Lands End to John O'Groats cycle ride and the Westminster to Devises canoe race in the aid of this cause; raising over £20,000 in the process.

References

"We have found Proficient Scaffolding to be an extremely organised and professional company; their Scaffolding operatives are experienced, well trained whilst also being polite and well-mannered (a valued commodity when compared to most scaffolding companies). The management team are very pro-active and generally fully equipped for every scenario thrown at them."

MD - Woodcock Construction Ltd

"Proficient Scaffolding is a company that it is a pleasure to work with. It is something of a rarity in business to find people that are not only professional and diligent but also 100% trustworthy; so when one does, one tends to stick with them. Proficient Scaffolding is such a company."

Project manager – Mansell Construction
